

The Windows Project

The Windows Project has been making writing fun with word games for children on Merseyside play schemes since 1976. Our brightly coloured board-games and fairground-style sideshows may involve throwing a ball, rolling dice, moving counters. There will be old favourites like *The Amazing Push Poem Machine* and introducing a brand-new game for the environment *Green Earth Soup*. Working one-to-one, our experienced writing tutors will help children to write their own poems and stories and add their own artwork which you can display around your centre or post on social media.
